Fadi Elamin

Founder & CEO, My Skies Aviation | UAV Innovation Leader | Defense & Technology Strategist

Fadi Elamin is a UAE-based aviation technology executive and strategic consultant with over a decade of experience shaping the unmanned aerial systems (UAS) ecosystem across the Middle East, Africa, and emerging global markets. As the Founder and CEO of My Skies Aviation, he leads the development and deployment of advanced drone solutions, U-Space frameworks, and integrated aerial technologies for government, defense, and critical infrastructure sectors.

With deep expertise spanning UAV operations, airspace integration, AI-driven systems, and next-generation mobility, Fadi has successfully delivered high-impact projects including drone-based firefighting systems, marine rescue platforms, drone-in-a-box operations, and smart aerial monitoring solutions. His work extends into advising civil aviation authorities and regulatory bodies on BVLOS operations, UTM/U-Space implementation, and future-ready airspace policies.

Recognized for his ability to bridge strategy, technology, and real-world execution, Fadi plays a key role in connecting governments with global technology partners—enabling scalable, secure, and compliant drone ecosystems. His partnerships span the GCC, Africa, and Europe, supporting national visions around digital transformation, smart cities, and advanced air mobility.

Beyond operations, Fadi is an active industry voice and speaker at international exhibitions and conferences, where he shares insights on defense innovation, aerial intelligence, and the evolving role of UAVs in security and economic development. He is also committed to empowering the next generation of innovators through mentorship and strategic advisory.

Fadi continues to drive the future of unmanned aviation—positioning drones not just as tools, but as critical infrastructure for modern nations.
